

First Question Catalogue – INWASOL Watercontainer Projects

I. Description of available water / water source

- Which water source is available (lake, river, ground water, etc)
- Description of the location of the water source
- Which kind of procedures would be necessary to use the water source?

II. Water quality

- What do you know about the water quality of the water source in general?
- Do (e.g.) water contaminations with arsenic, uranium or fluorides exist in this area?

(Explanation: in an advanced phase of a project review we will need a chemical water analyses of the water source in question, but this is not necessary for this first question catalogue)

III. Population / business environment at the location

- How many people live an area of (about) 2, 5, 10 and 20 kilometres
- Are there (also) potential large customers? (like e.g. hospitals, schools, authorities, industries and companies?)

IV. Which business model may fit – from your opinion - for your project proposal? E.g.

- Contract with municipality or other state authority
- Water vending over INWASOL and water entrepreneurs (means mainly operation over INWASOL)
- Mixed structures with involvement of public water supply and water vending structures over INWASOL
- Rental or leasing models – with own operation through a private or public partner
- Other ideas and suggestions?

V. Status Quo of public water supply at the location

- How is the situation of public water supply at the location / on the surrounding area?
- How is the quality of water through public water supply in this area?
- What is the price and price model for public water in this area?

VI. Private water providers

- Do private providers for drinking water already exist in this area?
- If yes: In which form and for (round about) which amounts? (e.g. tank trucks, private water bottling stations, selling of normal common mineral water, etc)
- If yes: how is the quality of those private water providers?
- If yes: what are the prices from those private water providers?

VII. Potential partners for your project? E.g.

- Authorities / municipalities / politicians
- Local companies / business people
- NGOs
